***Election/Restrictions***

Claims 1, 2 and 7 to 10 are directed to an allowable product. Pursuant to the procedures set forth in MPEP § 821.04(B), claim 6, directed to the process of making or using an allowable product, previously withdrawn from consideration as a result of a restriction requirement, is hereby rejoined and fully examined for patentability under 37 CFR 1.104.

Because all claims previously withdrawn from consideration under 37 CFR 1.142 have been rejoined, **the restriction requirement as set forth in the Office action mailed on December 4, 2007 is hereby withdrawn.** In view of the withdrawal of the restriction requirement as to the rejoined inventions, applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

In view of the above noted withdrawal of the restriction requirement, applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

### **EXAMINER'S AMENDMENT**

Authorization for this examiner's amendment was given in a telephone interview with Mr. Weining Wang on June 22, 2010.

The application has been amended as follows:

Claim 1, 2, 7 to 10 have been amended by changing "ferritic" to --ferrite—located on line 1 of claim and also second to last line of claim.

Claim 6, line 6, "15" has been changed to -- 0.8 --.

### ***Allowable Subject Matter***

Claims 1, 2 and 6 to 10 are allowed.

The following is an examiner's statement of reasons for allowance: A hot-rolled steel sheet composition having a strength of at least 1049 N/mm<sup>2</sup> excellent in hole expandability and ductility and having a ferrite structure which is strengthened by TiC and/or NbC precipitates, Mn and C without adding Mg; and its method of making as recited in claims 1, 2 and 6 to 10 are not taught or fairly suggested by the art of record for the reasons set forth in Applicants' remarks filed May 27, 2010.

As stated by Applicants, applied references, Japanese patent 2002-180188, Japanese patent 2002-180189 and Japanese patent 2002-180190 are directed to a steel having a ferrite-bainite microstructure, and in view of examples exhibits a tensile

Art Unit: 1793

strength no higher than  $988\text{N/mm}^2$  (Example 8 in table 2 of JP'188),  $984\text{ N/mm}^2$  (Example 5 in table 2 of JP'189) and  $976\text{ N/mm}^2$  (Example 976N/mm<sup>2</sup>). In contrast, Applicants' claims 1, 2, and 6 to 10 recite steel having a ferrite microstructure which would exclude prior art bainite and exhibits a tensile strength of at least  $1040\text{N/mm}^2$ , which is significantly higher than prior art.

Also Japanese patents disclose a method of making steel sheet comprising the step of air cooling for 2 to 15 seconds after hot rolling and cooling which is significantly higher than the air cooling time of 0.5 to 0.8 seconds recited in Applicants' claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Deborah Yee whose telephone number is 571-272-1253. The examiner can normally be reached on monday-friday 6:00 am-2:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Roy King can be reached on 571-272-1244. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
